Richard Strange, Research Analyst
Matilda Westenberger, Secretary

INTRODUCTION

The Annual Planning Information report is intended for use by area planners and labor service divisions as a tool to remedy the problems of unemployment. It is also intended to serve as an employer guide to the economic situation in Kansas.

The 1984 Annual Planning Information Report provides detailed information for use in the administration of the Job Training Partnership Act of 1982. This report is one of several reports published periodically by the Research and Analysis Section of the Kansas Department of Human Resources.

Labor force information contained in this report is adjusted to the Current Population Survey (CPS), the method by which the national estimates are compiled. Each county is adjusted so that all counties total the state adjusted figure, a procedure desirable to assure equitable distribution of federal funds.

HIGHLIGHTS

- * Total employment in Kansas is projected to reach approximately 1,138,300 by the end of the 1985 fiscal year. This represents an increase of 1.4 per cent from 1983 to 1985.
- * The adjusted unemployment rate in Kansas moved down slightly from 6.3 per cent of the labor force in 1982 to 6.1 per cent in 1983. The southeastern part of the state continues to show the highest levels of joblessness.
- * Wages in Kansas averaged \$13,300 during the fiscal year ending June 1983.
- * 1980 Census figures revealed approximately 337,139 economically disadvantaged persons living in Kansas.
- * There were nearly 3,950 unfilled job openings in Kansas as of February 1, 1984. At the same time there were approximately 41,200 persons seeking work through local Job Service Centers.

DESCRIPTION OF AREA

JOB TRAINING PARTNERSHIP ACT

The Job Training Partnership Act of 1982 marshalls federal, state and local resources to help prepare economically disadvantaged and long-term unemployed people to become productive labor force members. The Act initiated a major reform of the state's employment and training planning and delivery systems, and replaced the Comprehensive Employment and Training Act (CETA), which expired September 30, 1983. Service Delivery Areas (SDA's) are regions within the state where job training programs authorized by JTPA are implemented, and local area employment and training planning are accomplished. A Private Industry Council (PIC), with a majority representation from the private sector, is established in each SDA and shares policy and oversight responsibilities with locally elected officials.

In accordance with the provision of the Job Training Partnership Act, five Service Delivery Areas are designated in Kansas as outlined on the map below.

For further information please contact: Larry E. Wolgast, Ed.D., Assistant Secretary, Division of Employment and Training, Department of Human Resources, 401 Topeka Avenue, Topeka, Kansas 66603.

PRIVATE INDUSTRY COUNCIL
and
LOCAL ELECTED OFFICIAL CHAIRS

SDA I

PIC Chair

Ed Pogue
Senior Vice President
Planters Bank and Trust
138 N. Santa Fe
Salina, KS 67401
(913) 825-7221

LEO Chair

Charles M. Benjamin
Harvey County Commissioner
Harvey County Courthouse
P. O. Box 371
N. Newton, KS 67117
(316) 283-6900

SDA II

T. Michael Fegan
Vice President & General Manager
Fegan Enterprises, Inc.
P. O. Box 670
Junction City, KS 66441
(913) 238-8101

Jack Alexander
City of Topeka Commissioner
215 East 7th Street
Topeka, KS 66603
(913) 295-4000

SDA III

Ms. Doris J. Weber
Special Project Director
Inland Industries, Inc.
10151 West 84th Street
Overland Park, KS 66212
(913) 642-1839

Robert C. Bacon
Johnson County Commissioner
Johnson County Courthouse
Santa Fe and Kansas
Olathe, KS 66061
(913) 782-5000

SDA IV

Gary Hanssen, Vice President
Industrial Relations
Beech Aircraft Corporation
P. O. Box 85
Wichita, KS 67201
(316) 681-7111

Margalee Wright
Mayor, City of Wichita
City Hall - First Floor
455 North Main
Wichita, KS 67202
(316) 268-4331

SDA V

Eugene H. Horton
Vice President
Atkinson Industries, Inc.
Pittsburg, KS 66762
(316) 231-6900

Perl Bass
Labette County Commissioner
Labette County Courthouse
Oswego, KS 67356
(316) 795-4522

POPULATION

Total population in Kansas in 1980 totaled 2,363,679. Females made up 51 per cent of the states population. By age groups, 15 per cent were in the 14 to 21 age bracket, 42 per cent were between the ages of 22 to 54, and 23 per cent were 55 and over. Minorities accounted for 9.2 per cent of the states population. The Black population made up 5.3 per cent of the states total, Hispanics-2.7 per cent, American Indian-0.6 per cent, and Hawaiian and Pacific Islanders-0.6 per cent. Approximately 0.2 per cent were high school dropouts during the 1982-83 school year, 4.8 per cent were handicapped, and 12.7 per cent were veterans. There are five Service Delivery Areas, referred to as SDA's, in the state of Kansas. SDA I is the largest of the five areas and contains most of the population at 596,428. SDA III encompasses the smallest area but is second in population at 497,413.

Kansas Statistical Abstract 1982-1983

PER CAPITA PERSONAL INCOME

The 1981 average per capita income in Kansas moved up to \$10,824 from \$9,889 in 1980, a gain of 9.5 per cent. From 1977 to 1981 the per capita income of Kansas residents increased \$3,675 or 51.4 per cent. SDA III recorded the highest per capita income level with \$12,874 followed by SDA IV at \$11,743. SDA V had the lowest income at \$9,091. On a county basis, Johnson County moved to the top of the list with a per capita income of \$15,151 replacing Wichita County which was first in 1980. Wichita County fell from \$18,460 in 1980 to \$13,976 in 1981 for a 32 per cent decrease. Chautauqua County had the lowest income level at \$7,588.

The Consumer Price Index tells us what changes are taking place in the purchasing power of the dollars we spend. The index tells us how the cost of the market basket of goods and services changes over time by recording the prices of goods and services an average family buys. It is important to remember that it is a price index and not a cost-of-living index - although the public often refers to it as the latter, and often uses it that way. The Consumer Price Index does not attempt to report changes in the style of living. It simply measures the changes in prices for a scientifically selected market basket based on the average experience of certain population groups.

ANNUAL WAGES RECEIVED BY EMPLOYEES

Kansans averaged just over \$13,300 in yearly wages from July 1982 through June 1983. Not surprisingly, Service Delivery Area IV led the way with an average of slightly more than \$15,700. The Wichita Metropolitan Area is included within this SDA where wages are bolstered by higher earnings in the manufacturing industry, particularly aircraft.

Total wages for the fiscal year ending June 1983 ranged from a high of over \$2 billion in Sedgwick County (SDA VI) to a low of about \$3.5 million in Hodgeman County (SDA I).

ECONOMICALLY DISADVANTAGED

An economically disadvantaged person is defined as an individual who:

- (1) receives, or is a member of a family which receives cash welfare payments under a federal, state or local welfare program;
- (2) has, or is a member of a family which as, received a total family income for the six months prior to application, which, in relation to family size, was not in excess of the higher of:
 - (a) the poverty level determined in accordance with criteria established by OMB: or
 - (b) 70 per cent of the lower living standard income level,
- (3) is receiving food stamps pursuant to the Food Stamp Act of 1977;
- (4) is a foster child on behalf of whom state or local government payments are made, or
- (5) in cases permitted by regulations of the Secretary, is an adult handicapped individual whose own income meets the requirements of (1) or (2) but who is a member of a family whose income does not meet such requirements.

Income figures, either OMB poverty level or 70 per cent of the Lower Living Standard Income Level, are provided periodically from the Employment and Training Administration. The most recent income guidelines are given below.

Family Size

1	\$ 4,860	For each additional
2	6,540	<u>family member:</u>
3	8,420	
4	10,400	For family unit with
5	12,270	more than (6) members,
6	14,350	add: \$ 2,080.

According to estimates provided by the Census Bureau, there were 337,139 economically disadvantaged persons living in Kansas. Nearly 60 per cent of this total were over age 21 while just over 13 per cent were between the ages of 16 and 21.

Most of the persons designated as being economically disadvantaged were located in Service Delivery Area I while the fewest number were found in the southeast corner of the state in SDA V.

ECONOMIC DEVELOPMENTS AND OUTLOOK

Kansas, as well as the nation, has reversed the trend of high unemployment experienced in the 1981-1982 recession. The State's relative position of only modest joblessness during the peak of the recession places it in a strong economic posture at the close of calendar year 1983. Inflation was greatly reduced during 1983 and should provide, along with a relatively low unemployment rate, a sound base for continued recovery throughout FY 1984 and 1985. Economic growth during the two years is expected to be somewhat repressed as legislators at both the state and national levels address increased demands for money either through increased taxes or borrowing.

During FY 1982, nonfarm wage and salary employment dropped in Kansas by 3.2 per cent as substantial reductions in manufacturing jobs occurred. Mining and construction also experienced reduced workforces during the period. During fiscal year 1983 recessionary pressures began to recede and a growth of 1.1 per cent occurred in the number of nonfarm wage and salary workers.

Fiscal years 1984 and 1985 are expected to show continued growth in employment. Manufacturing jobs are anticipated to increase slightly during the period. The number of jobs in mining, transportation and government are projected to decline as both the private and public sectors compete for money.

The following tables reflect fiscal year changes in the Kansas economy. Data for FY 1982 and 1983 are predicated on relatively sound benchmarked data. Fiscal years 1984 and 1985 civilian labor force and nonfarm wage and salary data are estimates based on trends, limited data and concerns over potential increased taxes and higher interest rates.

EMPLOYMENT

The number of persons employed in Kansas grew from 1,111,000 in calendar year 1982 to 1,113,000 in calendar year 1983, an increase of less than two tenths of one per cent. The 1980 civilian labor force participation rate for the state was 62.4 per cent led by Service Delivery Area III and IV with 66.0 per cent each.

Most of the employment in the state can be found in SDA I with nearly 27 per cent of the total. Possibly the most significant information found in the accompanying 1983 tables is that only about 11.8 per cent of the workers are found in SDA V where the jobless rate stood at 7.7 per cent of the labor force. The civilian labor force participation rate for this area is the lowest of the SDA's showing just 57.5 per cent.

UNEMPLOYMENT

The adjusted unemployed total for the state of Kansas averaged 72,000 in 1983 with an unemployment rate of 6.1 per cent. The southeastern part of the state continued to remain higher as both Service Delivery Area's IV and V recorded unemployment rates of 7.7 per cent. SDA I had the lowest rate at 4.6 per cent followed by SDA III at 5.3 per cent and SDA II with 6.1 per cent. On a county basis, Montgomery County led all counties with a 12.2 per cent unemployment rate, well above the national and state averages. The next highest rate was Labette County at 9.7 per cent. Ness County had the lowest rate at 2.1 per cent. Seven counties had rates of 8.0 to 8.9 per cent, 16 counties were in the 7.0 to 7.9 per cent range and 11 counties were 6.0 per cent to 6.9 per cent. For 1984 it is anticipated that the southeastern part of the state will continue to have the highest level of unemployment.

JOB SERVICE CENTERS
UNFILLED JOB OPENINGS

There were nearly 3,950 unfilled job openings in Kansas as of February 1, 1984. Over one-third of these were for occupations in the clerical and sales category. Approximately one-half of all the job openings had been listed with the local Job Service Centers for over thirty days.

Although most of the job openings listed were in the trade industry division (31 per cent), vacancies in both the services and manufacturing segments equalled approximately 25 per cent.

The fewest number of unfilled job openings in Kansas as of February 1, 1984 occurred in the areas of agriculture and processing.

Most of the labor shortages experienced statewide as of the first of February were in sales occupations. Significant labor surpluses, on the other hand, were found in the miscellaneous construction occupations as well as occupations in moving and storing materials and products.

JOB APPLICANTS BY OCCUPATIONAL CATEGORIES

As of January 1984 there were 41,212 persons actively seeking work through the Kansas Job Service Centers. Most of these job applicants were looking for clerical and sales occupations followed by service and miscellaneous occupations.

The greatest number of active job seekers were located in Service Delivery Area III which is made up of Johnson, Leavenworth and Wyandotte counties. Nearly one-fourth of these applicants were searching for miscellaneous occupations. Thirty per cent of all the job seekers in the professional, technical and managerial category were located within this SDA.

The fewest number of job applicants were found in SDA V where only 4,647 persons were registered for work. One-half of the registered job applicants in this area were located in Lyon and Montgomery counties.

GLOSSARY OF SELECTED TERMS

CIVILIAN LABOR FORCE

Consists of all persons 16 years of age and over classified as employed or unemployed persons in the civilian noninstitutional population, by place of residence. The civilian labor force excludes military personnel. Noninstitutional population excludes inmates of penal or mental institutions, sanitariums, or homes for the aged, infirm, or needy. Labor force estimates are benchmarked annually, i.e., revised/updated by conversion methodology from benchmarked work force estimates.

CONSUMER PRICE INDEX (CPI)

The Consumer Price Index is a statistical measure of change-over time - in the prices of goods and services in major expenditure groups typically purchased by urban consumers: food and beverages, housing, apparel, transportation, medical care and entertainment. It measures the change in prices by comparing what a sample "market basket" of goods and services cost today with what the same sample market basket cost at an earlier date. The CPI for All Urban Consumers covers about 80 per cent of the total noninstitutional population. It includes, in addition to wage earners and clerical workers other groups previously excluded from CPI coverage such as salaried workers, the self-employed, retirees and the unemployed. The CPI for Urban Wage Earners and Clerical Workers covers about 40 per cent of the total noninstitutional population.

COVERED EMPLOYMENT

Count of all workers who are earning wages from employers covered by the Kansas Employment Security Law.

DURABLE GOODS

Durable goods are items with a normal life expectancy of three years or more. Automobiles, furniture, household appliances and mobile homes are common examples. Because of their nature, durable goods expenditures are generally postponable. As a consequence, durable goods sales are the most volatile component of consumer expenditures. Automobiles and parts, and furniture and household goods account for the majority of expenditures on durable goods.

EMPLOYMENT (On A Labor Force Basis)

Includes an unduplicated estimate of area residents who earned wages during the week including the 12th of each month. This estimate includes agricultural and self-employed workers, as well as residents who were employed in wage and salary jobs within the labor market area or in another labor market area, and residents involved in labor-management disputes.

Agricultural Employment

Includes only those persons employed in crop and livestock production. Agricultural services are included in nonagricultural employment (Service Industry).

Nonagricultural Employment

Includes persons on nonagricultural payrolls (including employees on paid sick leave, paid holiday, or paid vacation) who work or receive pay for any part of the pay period including the 12th of the month. Also includes self-employed, proprietors, unpaid family workers, domestics in private households.

NONDURABLE GOODS

Nondurable goods are items which generally last for only a short time (three years or less). Food, beverages, clothing, shoes and gasoline are common examples. Because of the nature of nondurable goods, these are generally purchased when needed, and expenditures grow approximately in line with population growth. Personal consumption expenditures for food and beverages comprise about one-half of the expenditures on nondurable goods, while clothing and shoes account for almost one-fifth.

STANDARD METROPOLITAN STATISTICAL AREAS (SMSA)

Standard Metropolitan Statistical Areas are established by the OMB (federal Office of Management and Budget) so that local economic and social statistics collected by many government and private organizations may be presented on a common geographic basis. Two basic considerations are involved in the establishment of an SMSA. First, each SMSA must include at least one city with 50,000 or more inhabitants, or two cities having contiguous boundaries and constituting, for general economic and social purposes, a single community with a combined population of at least 50,000. The smaller city must have a population of at least 15,000. In addition, at least 75 per cent of the labor force must be nonagricultural, thus defining the metropolitan character of the area.

UNEMPLOYMENT (On A Labor Force Basis)

Unemployment (total) is an unduplicated estimate of area residents who did not earn any wages during the survey week including the 12th of the month, and who were able, available, and actively seeking work during the thirty-day period preceding the survey week.

UNEMPLOYMENT RATE

Unemployment rate is the total number of unemployed in the labor market area divided by the civilian labor force in the area.

WORK FORCE (Wage And Salary Employment, By Place Of Work)

An estimate of the number of individual jobs in an area during the survey week which includes the 12th of the month. Estimates are calculated by place of workers, agricultural workers and workers involved in labor-management disputes. Estimates include both part-time and full-time jobs, also included are nonresidents who commute into the labor market area for work, as well as individuals who have more than one job in the same labor market area. Work force estimates are benchmarked annually, i.e., revised/updated based upon employer contributions data.
